charlesoconor commented on Jan 6, 2024

Would it be possible to release earlier versions with this cherry-picked on? Since it's a CVE.

Member

No, we only support the latest version, please upgrade or patch.

This is a Python-only change (no C changes) so will be easier to patch if you can't upgrade.

And there have been more security fixes since, such as in this week's release. We do recommend upgrading.
