Purpose

- Remove `Nemotron_Nano_VL_Config` copy, because the config backward compatibility issue has been resolved in recent Transformers release.

Test Plan

```
python
examples/offline_inference/vision_language.py
nemotron_vl
```

Test Result

Model can still generate reasonable outputs after cleanup.

[@russellb](#) [GHSA-8fr4-5q9j-m8gm](#) do you think you can update the minimum affected version to say $\geq 0.10.0$? vLLM didn't add this config in until this [commit](#)
