

Segmentation fault in tf.histogram_fixed_width #45770

✓ Closed

DNXie opened on Dec 17, 2020

Please make sure that this is a bug. As per our

[GitHub Policy](#),

we only address code/doc bugs, performance issues, feature requests and build/installation issues on GitHub. tag:bug_template

System information

- Have I written custom code (as opposed to using a stock example script provided in TensorFlow): No
- OS Platform and Distribution (e.g., Linux Ubuntu 16.04): Linux Ubuntu 18.04
- Mobile device (e.g. iPhone 8, Pixel 2, Samsung Galaxy) if the issue happens on mobile device: N/A
- TensorFlow installed from (source or binary): binary
- TensorFlow version (use command below):2.1.0
- Python version:3.7.6
- Bazel version (if compiling from source):N/A
- GCC/Compiler version (if compiling from source):N/A
- CUDA/cuDNN version:N/A
- GPU model and memory:N/A

Describe the current behavior

`tf.histogram_fixed_width` crashes (segmentation fault) when `values` contain nan

Describe the expected behavior

Expect no crash

Standalone code to reproduce the issue

```
import tensorflow as tf
import numpy as np
tf.histogram_fixed_width(values=np.nan, value_range=[1,2])
```

• •

Does this also reproduce with TF 2.4?

• •

@mihaimaruseac

I have tried in colab with TF 2.4 and i was able to reproduce the issue. Please, find the gist [here](#). Thanks!

Looks like `values` don't expect `nan` values. Should I open a PR that raises an error if there are `nan` in `values` ?

I see that the example crashes if executed on cpu with TF 2.4 where as on gpu execution with TF 2.4 it passes with following output.

  **ymodak** added **stat:awaiting tens...** on Jan 7, 2021

  **mihairaruseac** added **TF 2.5** on Jun 9, 2021
