

Redis 7.0.10 crashed by signal: 11, si_code: 1 #608

Closed

jerrytesting opened on Apr 13, 2023

We found one crash while running redis-7.0.10 with the redisraft-cd52ee4. The following is the bug report:

```
2023-04-13 07:56:48 Jepsen starting /opt/redis/redis-server --protected-mode no --bind
0.0.0.0 --dbfilename redis.rdb --loadmodule /opt/redis/redisraft.so --raft.loglevel debug
--raft.log-filename raftlog.db --raft.log-max-file-size 32000 --raft.log-max-cache-size
10000000 --raft.follower-proxy yes
3438:C 13 Apr 2023 07:56:48.130 # 000000000000 Redis is starting 000000000000
3438:C 13 Apr 2023 07:56:48.131 # Redis version=7.0.10, bits=64, commit=6523d019,
modified=0, pid=3438, just started

Collaborator ...

@jerrytesting Please use redis "unstable" branch with redisraft "master" branch. Redisraft is still being developed and currently, we only maintain compatibility with redisraft (master) and redis (unstable) branches.

 **tezc** mentioned this [on Apr 13, 2023](#)

 [Better redis version check #609](#)

 **fadidahanna** closed this as [completed](#) [on Apr 16, 2023](#)

ajakk on May 19, 2023

...

[CVE-2023-31655](#) was assigned for this, with a description of:

redis-7.0.10 was discovered to contain a segmentation violation.

But this seems invalid given that I see redisraft in the above backtrace and maintainer comment. Can anyone confirm?

fadidahanna on May 31, 2023

Contributor ...

@ajakk, As **@tezc** mentioned above, the segmentation violation is related to the fact that RR run against Redis-7.0.10, a Redis version that doesn't not support some of the functionality RR requires. Redis Raft is still WIP, and therefore we support only Redis unstable.
